DETAILED ACTION

Election/Restrictions

In light of the newly submitted claims 10-22, the restriction requirement made in Paper No. 3 is hereby withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention

Each of claims 1-22 contains at least a new subject matter which is not supported by the original disclosure. Claims 1-3 each recites "rectangular cube corner elements"; however, neither the original specification nor Fig. 9 discloses or suggests the cube corner elements having a rectangular shape. The feature recited in claim 4 is a new matter which is not supported by the original disclosure. Also, nowhere in the original disclosure is there a support for each of the features recited in each of the claims 5-22. Figs. 3-4 and 9 and the accompanying text do not appear to disclose or suggest the claimed limitations.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Heenan et al '214. See Figs. 17-21, Figs. 27C and 29A and claims 1-5 in column 34.

In re claims 1-4 and 13 the blades 110 (see Figs, 17-21) have been taken as laminae.

Conclusion

Each of Benson et al (U.S. Pat. No. 6,253,442) and Smith et al (U.S. Pat. No. 6,533,887) discloses a retroreflective cube corner sheeting and method for making the same. They do not appear to be prior art.
